## Introduction

Type `\usepackage{bibarts}` into your *file.tex*, and `\bacaptionsenglish` to switch to English captions (to name pages p., not S.). They are used here. `\bacaptionsfrench` sets French captions; default is `\bacaptionsgerman`.

You need to write the full reference once (the page number [Pg] is optional):

```
\vli{FirstName}{LastName}
  {The \ktit{kTitle},
   place and year of
   publication}[Pg].
```

FirstName LASTNAME: The kTitle,  
place and year of publication (cited  
as LASTNAME: kTitle [L]), p. Pg.

This full reference will also be found in the Bibliography (see `\printvli` on p. 4). The Bi<sup>b</sup>A<sub>t</sub>s' program `bibsort` creates your List of Literature. You have to enter at the prompt: (1) L<sup>A</sup>T<sub>E</sub>X file, (2) `bibsort -utf8 file`, (3) L<sup>A</sup>T<sub>E</sub>X file.  
After the first full citation (voll), you may use shortened references (kurz):

```
\kli{LastName}{kTitle}[Pg].
```

LASTNAME: kTitle [L], p. Pg.

Use `\vqu` and `\kqu` in the same way to cite published documents (Quellen):

```
\vqu {Carl von} {Clausewitz}
  {\ktit{Vom Kriege}.
   Hinterlassenes Werk, 3\fup{rd}
   ed.\ Frankfurt/M. 1991}[3].
\kqu{Clausewitz}{Vom Kriege}[3].
```

Carl von CLAUSEWITZ: Vom Kriege.  
Hinterlassenes Werk, 3<sup>rd</sup> ed. Frankfurt/M. 1991 (cited as CLAUSEWITZ:  
Vom Kriege [D]), p. 3.

CLAUSEWITZ: Vom Kriege [D], p. 3.

Then, `\printvqu` will print a List of Published Documents (full references). And `\printnumvkc` (p. 5) will print an index of all your shortened references (from `\kli`, `\kqu`, and from `\ktit` inside the last argument of `\vli` or `\vqu`).

There are also Bi<sup>b</sup>A<sub>t</sub>s-commands to cite periodicals and archive documents:

```
\per{Journal}_Num_[Pg]
\arq{Unpublished Document}
  {Archive File Sig}|Vol|(Folio)
```

JOURNAL Num, p. Pg  
Unpublished Document, Archive File  
Sig, vol. Vol, folio Folio

`\printper` your Periodicals, and `\printarq` the List of Archive Files. Spaces are forbidden before the optional arguments [Pg], (Folio), |Vol|, or \_Num\_.

In footnotes, and `minipage` footnotes, Bi<sup>b</sup>A<sup>r</sup>S is introducing IBIDEM automatically. That means, that `\kli`, `\kqu`, `\per`, and `\arq` can change to IBIDEM:

```
<1> ... \footnote{ \vli{Niklas} {Luhmann} {\ktit{Soziale Systeme}.}
                    Grundriß einer allgemeinen Theorie, Frankfurt/M. 1984}.}

<2> ... \footnote{\kli{Luhmann}{Soziale Systeme}|1|[22], and
                    \kli{Luhmann}{Soziale Systeme}|1|[23].}

<3> ... \footnote{\kli{Luhmann}{Soziale Systeme}|1|[23]. Next sentence.}

<4> \footnote{\kli{Luhmann}{Soziale Systeme}|2|[56].}

<5> ... \footnote{\arq{Haber to Kultusminister, 17 December 1914}
                    {GStAPK, HA\,1, Rep~76~Vc, Sekt~1, Tit~23,
                     Litt~A, Nr.\,108}|2|(223\f).}

<6> \footnote{\arq{Setsuro Tamaru to Clara Haber, 24 December 1914}
                    {GStAPK, HA\,1, Rep~76~Vc, Sekt~1, Tit~23,
                     Litt~A, Nr.\,108}|2|(226-231).}

<7> \footnote{\arq{Setsuro Tamaru to Clara Haber, 24 December 1914}
                    {GStAPK, HA\,1, Rep~76~Vc, Sekt~1, Tit~23,
                     Litt~A, Nr.\,108}|2|(226-231).}

<8> \footnote{\arq{Valentini to Schmidt, 13 March 1911}
                    {GStAPK, HA\,1, Rep~76~Vc, Sekt~1, Tit~23,
                     Litt~A, Nr.\,108}|1|(47).}

\fillarq{GStAPK, HA\,1, Rep~76~Vc, Sekt~1, Tit~23,
         Litt~A, Nr.\,108} {2\,Vols.}
```

When you introduce a book,<sup>1</sup> you are free to add a `|Vol|`, or not. But if you set a `|Vol|` once, you will have to repeat that, when you refer to the same book in the following footnote (or say `\clearbame`). [Pg] is equivalent. You may also cite one work several times in the same footnote.<sup>2 3 4</sup>

And here are examples about how to cite archive sources.<sup>5 6 7 8</sup> The `\fillarq` above adds to the entry in the `arq`-list that “Nr. 108” has 2 volumes [see p. 5].

---

<sup>1</sup> Niklas LUHMANN: Soziale Systeme. Grundriß einer allgemeinen Theorie, Frankfurt/M. 1984 (cited as LUHMANN: Soziale Systeme [L]).

<sup>2</sup> IBIDEM, vol. 1, p. 22, and IBIDEM, p. 23.

<sup>3</sup> IBIDEM, p. 23. Next sentence.

<sup>4</sup> IBIDEM, vol. 2, p. 56.

<sup>5</sup> Haber to Kultusminister, 17 December 1914, GStAPK, HA 1, Rep 76 Vc, Sekt 1, Tit 23, Litt A, Nr. 108, vol. 2, folii 223 f.

<sup>6</sup> Setsuro Tamaru to Clara Haber, 24 December 1914, IBIDEM, folii 226-231.

<sup>7</sup> IBIDEM.

<sup>8</sup> Valentini to Schmidt, 13 March 1911, IBIDEM, vol. 1, folio 47.

## Switches

For writing an essay without a List of Literature, type \conferize at the top of your L<sup>A</sup>T<sub>E</sub>X file; then, \kli will print a cross-reference to the full reference:

```
\conferize ... \footnote{
  Full ref.: \vli{Niklas}
    {Luhmann} {\ktit{Soziale
      Systeme}. Grundriß
      einer allgemeinen Theorie,
      Frankfurt/M. 1984}[22].}
  ...
  pp. \footnote{ \notibidemize
    \%no ibidem in this footnote%
  Shortened ref.: \kli{Luhmann}
    {Soziale Systeme}[23\f].}
```

...<sup>1</sup> [u, v] or [w-x] or [y\f] or  
[z\baplural] are creating pp.<sup>2</sup>

---

<sup>1</sup> Full ref.: Niklas LUHMANN: Soziale Systeme. Grundriß einer allgemeinen Theorie, Frankfurt/M. 1984 (cited as LUHMANN: Soziale Systeme [L]), p. 22.

<sup>2</sup> Shortened ref.: LUHMANN: Soziale Systeme [cf. p. 1, n. 1], pp. 23 f.

If k-commands \kli and \kqu are never used, \notannouncektit shortened references at v-commands (cited as ... will not be printed at \vli and \vqu).

No historian? Set \notprinthints – you will never use \vqu or \kqu, and therefore, it is unnecessary to print [L], because there is only one v-list.

## The extra \*{argument} of v- and k-commands

*Works by multiple authors:* Use x-commands with co-authors in \*-arguments:

```
Set names ... \footnote{Two:
  \xvli{FirstName}{LastName}
  *\{\vauthor{co-FirstName}
    {co-LastName}\}
  {The \ktit{kTitle2} ETC}.}
  ...
  to ibidemize.\footnote{
  \xkli{LastName}
  *\{\kauthor{co-LastName}\}
  {kTitle2}[11-14].}
```

Set names in \vauthor – \kauthor.<sup>3</sup>  
That's necessary to ibidemize.<sup>4</sup>

---

<sup>3</sup> Two: FirstName LASTNAME / co-FirstName CO-LASTNAME: The kTitle2 ETC (cited as LASTNAME / CO-LASTNAME: kTitle2 [L]).

<sup>4</sup> IBIDEM, pp. 11-14.

You may also use \*-arguments to mask text (\editor) in the ibidemization:

```
... \footnote{An edited book is
  \vli{FirstName}{LastName}
  *\{\onlyvoll{\editor}\}
  {The \ktit{kTitleEd} ETC}[2].}
  \footnote{ %Without *-argument:
  \kli{LastName}{kTitleEd}[3, 6].}
```

\editor has no sorting weight.<sup>5</sup> <sup>6</sup>

---

<sup>5</sup> An edited book is FirstName LASTNAME (ed.): The kTitleEd ETC (cited as LASTNAME: kTitleEd [L]), p. 2.

<sup>6</sup> IBIDEM, pp. 3, 6.

For works with three or more authors, you have to set all ‘middle’ authors in \midvauthor (or \midkauthor), and the ‘last’ in \vauthor (or \kauthor):

```
... \footnote {See
  \xvli{Manfred F.}{Boemeke}
  *{\midvauthor{Roger}
    {Chickering}
    \vauthor{Stig}{Förster}%
    \onlyvoll{ \editors}}
  {\ktit{Anticipating Total War}
    The German and American
    Experiences 1871--1914,
    Cambridge/U.\,K. 1999}.}
... all LastNames. \footnote {
  \xkli{Boemeke}
  *{\midkauthor{Chickering}
    \kauthor{Förster}}
  {Anticipating Total War}[9\f]!}
```

bibsort sorts \vauthor{F}{L}, and \midvauthor{F}{L} always as L F.<sup>7</sup>  
Repeat all LastNames in \xkli, but not the argument of \onlyvoll.<sup>8</sup>

---

<sup>7</sup> See Manfred F. BOEMEKE / Roger CHICKERING / Stig FÖRSTER (eds.): Anticipating Total War. The German and American Experiences 1871–1914, Cambridge/U.K. 1999 (cited as BOEMEKE / CHICKERING / FÖRSTER: Anticipating Total War [L]).

<sup>8</sup> IBIDEM, pp. 9 f.!

## Refer to different articles from the same source

Use \per inside the last argument of a v-command to cite articles in journals:

```
... \footnote {See \vqu {John
  Frederick Charles} {Fuller}
  {Gold Medal (Military)}
  \ktit{Prize Essay} for 1919,
  first published in:
  \per{Journal of the Royal
    United Service
    Institution}_458
    (1920)_[239-274]*[240].}
... \footnote { \kqu {Fuller}
  {Prize Essay}[241].}
... here. \footnote { \vqu{R.}
  {Chevenix Trench}
  {Gold Medal (Military)}
  \ktit{Prize Essay} for 1922,
  in: \per{Journal of the
    Royal United Service
    Institution}_470
    (1923)_[199-227]*[200].}
```

You can use \*[Pg] to cite a certain page inside [PgBegin-PgEnd]. Do not type spaces before \*[Pg].<sup>9</sup>  
BiBiDEM creates an outer IBIDEM here.<sup>10</sup>  
BiBiDEM creates an inner IBIDEM here.<sup>11</sup>

---

<sup>9</sup> See John Frederick Charles FULLER: } Gold Medal (Military) Prize Essay for 1919, first published in: JOURNAL OF THE ROYAL UNITED SERVICE INSTITUTION 458 (1920), pp. 239–274 (cited as FULLER: Prize Essay [D]), there: p. 240.

<sup>10</sup> IBIDEM, p. 241.

<sup>11</sup> R. CHEVENIX TRENCH: Gold Medal (Military) Prize Essay for 1922, in: IBIDEM, no. 470 (1923), pp. 199–227 (cited as CHEVENIX TRENCH: Prize Essay [D]), there: p. 200.

After the main arguments of \per, or \vli, etc., you are free to type \_Num\_, or |Vol|; both are only printing different separators (see in note 11: no. 470).

To cite an article from a book, you may use `\vli` for the book *inside the last v-argument*. `\printvli` is *printing* such inner references *as shortened references*; the *full inner reference* appears as separate item (see `Publ`). For further articles from the same book, you may use an inner `\kli` for the book:

<code>\footnote{\vli{} {Pitt} {The     \underline{ktit{First}}, in:     \vli{J.}{Yi}{The \ktit{iT}         \underline{Publ}}}}.</code>	<code>\vli[f]...</code> or <code>\kli[f]...</code> would refer to ‘the same female author’. <sup>12</sup> <sup>13</sup> <sup>14</sup>
	<sup>12</sup> PITT: The First, in: J. Yi: The <code>[iT]</code> <code>Publ</code> (cited as PITT: First [L]).
	<sup>13</sup> IBIDEM.
	<sup>14</sup> IDEM: The Second, in: IBIDEM, pp. 7-9 (cited as PITT: Second [L]), there: p. 8.

If the shortened inner referencing in the bibliography and the inner ibidemization in footnotes is not wanted, use `\ntvauthor` instead of the inner `\vli`:

<code>\footnote{\vli{Jost}{Dülffer}     {\em \ktit{Einleitung}}\em,     in: \ntvauthor{Jost}{Dülffer}     Bereit zum Krieg}[9].}</code>	<code>\emph{\ktit{...}}</code> masks cited as [...], so use <code>\em [...] \em</code> to emphasize! <sup>15</sup> <sup>16</sup>
<code>\footnote{\kli{Dülffer}     {Einleitung}}[9].</code>	<sup>15</sup> Jost DÜLFFER: <i>Einleitung</i> , in: Jost DÜLFFER: <i>Bereit zum Krieg</i> (cited as DÜLFFER: <i>Einleitung</i> [L]), p. 9.
	<sup>16</sup> IBIDEM.

If you use `\printnumvli` instead of `\printvli`, an *index referring to page and footnote numbers* will be printed. Here, `[iT]` is a centrally defined inner kTitle:

BOEMEKE, Manfred F. / CHICKERING, Roger / FÖRSTER, Stig (eds.): Anticipating Total War. The German and American Experiences 1871–1914, Cambridge/U.K. 1999 <sup>27</sup>

DÜLFFER, Jost: *Einleitung*, in: DÜLFFER, Jost: *Bereit zum Krieg* <sup>3</sup><sup>15</sup>

LASTNAME, FirstName: The kTitle, place and year of publication <sup>ii</sup>

~ (ed.): The kTitleEd ETC <sup>15</sup>

~ / co-LASTNAME, co-FirstName: The kTitle2 ETC <sup>13</sup>

LUHMANN, Niklas: Soziale Systeme. Grundriß einer allgemeinen Theorie, Frankfurt/M. 1984 <sup>iii<sup>1</sup>, 1<sup>1</sup></sup>

PITT: The First, in: Yi: `[iT]` [L] <sup>3</sup><sup>12</sup>

~: The Second, in: Yi: `[iT]` [L], pp. 7-9 <sup>3</sup><sup>14</sup>

YI, J.: The `[iT]` `Publ` <sup>3</sup><sup>12</sup>

In the case of multiple works by one author, you may enter `bibsort -k [...]` at the prompt. Then, in both v-lists, Bi<sub>b</sub>Ar<sub>t</sub>S inserts  $\sim$  instead of the repeated *first name and last name*. And `-e` prints the last names of co-authors first. Anyway, `\printbibtitle\printvli\printvqu` will print your bibliography:

## `\printbibtitle` **Bibliography**

### `\printvli` **Literature**

BOEMEKE, Manfred F. / CHICKERING, Roger / FÖRSTER, Stig (eds.): Anticipating Total War. The German and American Experiences 1871–1914, Cambridge/U. K. 1999.

DÜLFFER, Jost: *Einleitung*, in: DÜLFFER, Jost: Bereit zum Krieg.

LASTNAME, FirstName: The kTitle, place and year of publication.

$\sim$  (ed.): The kTitleEd ETC.

$\sim$  / CO-LASTNAME, co-FirstName: The kTitle2 ETC.

LUHMANN, Niklas: Soziale Systeme. Grundriß einer allgemeinen Theorie, Frankfurt/M. 1984.

PITT: The First, in: YI: `[iT]` [L].

$\sim$ : The Second, in: YI: `[iT]` [L], pp. 7-9.

YI, J.: The `[iT]` Publ.

### `\printvqu` **Published Documents**

CHEVENIX TRENCH, R.: Gold Medal (Military) Prize Essay for 1922, in: JOURNAL OF THE ROYAL UNITED SERVICE INSTITUTION 470 (1923), pp. 199-227.

CLAUSEWITZ, Carl von: Vom Kriege. Hinterlassenes Werk, 3<sup>rd</sup> ed. Frankfurt/M. 1991.

FULLER, John Frederick Charles: Gold Medal (Military) Prize Essay for 1919, first published in: JOURNAL OF THE ROYAL UNITED SERVICE INSTITUTION 458 (1920), pp. 239-274.

MARX, Karl: Das Kapital, in: MARX, Karl / ENGELS, Friedrich: Werke, 3 vols., 1<sup>st</sup> edition, Berlin 1962–1964.

Use e. g. `{\small \printvli}` to change the font size of a whole list. Besides, Bi<sub>b</sub>Ar<sub>t</sub>S provides commands to format the lists: The sequence `{\bibsorthheads \printvli}` places a capital letter as separator at the beginning of each group of entries starting with the same letter, whereas `{\bibsortsplaces \printvli}` only inserts additional vertical space there instead.

## \printnumvkc Shortened References

\printnumvkc prints an index of all your shortened references in `twocolumn`, whereas \printnumvkclist just prints your list without headings or title:

- BOEMEKE / CHICKERING / FÖRSTER: Anticipating Total War [L] 2<sup>7, 8</sup>
- CHEVENIX TRENCH: Prize Essay [D] 2<sup>11</sup>
- CLAUSEWITZ: Vom Kriege [D] ii, 6<sup>17</sup>
- DÜLFFER: Einleitung [L] 3<sup>15, 16</sup>
- FULLER: Prize Essay [D] 2<sup>9, 10</sup>
- LASTNAME: kTitle [L] ii
- LASTNAME: kTitleEd [L] 1<sup>5, 6</sup>
- LASTNAME / CO-LASTNAME: kTitle2 [L] 1<sup>3, 4</sup>
- LUHMANN: Soziale Systeme [L] iii<sup>1-4</sup>, 1<sup>1, 2</sup>
- PITT: First [L] 3<sup>12, 13</sup>
- PITT: Second [L] 3<sup>14</sup>
- YI: iT [L] 3<sup>12, 14</sup>

## \printper Periodicals

JOURNAL OF THE ROYAL UNITED SERVICE INSTITUTION 2<sup>9, 11</sup>

## \printarq Unpublished Documents

Archive File Sig.

GStAPK, HA 1, Rep 76 Vc, Sekt 1, Tit 23, Litt A, Nr. 108 2 Vols.

## \printnumarq Unpublished Documents

Archive File Sig ii

GStAPK, HA 1, Rep 76 Vc, Sekt 1, Tit 23, Litt A, Nr. 108 2 Vols. iii<sup>5-8</sup>

\arqsection{GStAPK}{Geheimes Staatsarchiv} may introduce a headline “GStAPK – Geheimes Staatsarchiv” above all GStAPK-entries in the list.

## Additional features

The following work is not mentioned in the text, but appears on the vqu-list:

```
!\begin{unused} \sethyphenation{ngerman}%% hyphenation travels along
  \vqu{Karl}{Marx}{Das \ktit{Kapital}, in: \midvauthor{Karl}{Marx}
    \ntvauthor{Friedrich}{Engels} Werke, \ersch|3|[1]{Berlin}{1962--1964}}
\end{unused}! Note, that %% vol.|3| and ed.[1] are optional
```

!! Note, that *inner v-commands* in {unused}-environments do not send an own item to the v-lists. So, such inner entries have to be repeated separately.

**BibTeX** does not only help to cite. The environment {originalquote} helps to quote from literature or sources. You may call all hyphenation settings, which your L<sup>A</sup>T<sub>E</sub>X possesses, in the [*optional argument*] of the environment:

\begin{originalquote}[german]%   ‘‘Dies ist die erste Wechselwirkung und das erste Äu\hyss erste, \fabra{...}.’’\footnote{The Eszett splits different here: {\sethyphenation{ngerman} %new = Au\hyss er}. \kqu{Clausewitz} {Vom Kriege}[19].}%   \end{originalquote}	“Dies ist die erste Wechsel- wirkung und das erste Äus- serste, [...].” <sup>17</sup>
	<sup>17</sup> The Eszett splits different here: Au- ßer. CLAUSEWITZ: Vom Kriege [D], p. 19. % In \scshape, \hyss prints ss, % and splits s-s (old AND new)!

In quotations, you may use \abra to insert additions. Use \fabra to prevent a line break between the closing bracket and the following text. **BibTeX** puts height-adjusted square brackets around the following additions:

\abra{},	=> “Red[,] blue and green were the
\abra{} \newsentence	=> colours[,] And % spacing
\abra{...} \abra{\dots}	=> there [...] were [...] others,
\abra{---}	=> [---] let's say [---]
\abra{-} \abra{--}	=> green[-red[-]painted.
\fabra{'} \fabra{'}	=> [']Marks[']. % U+0060 and U+0027
\fabra{"} \fabra{''}	=> [“]Good![”]
\fabra{"} \fabra{"}	=> [”]Good![”] % or \abra{\dq{}}
\abra{sic!}.”	=> [sic!].” % unknown=>normalsize

**BibTeX** defines S\fup{te} => S<sup>te</sup> (if that command for *French up* is undefined) and does also help to set ordinals in English, French and German:

\eordinal{103} Assistant.	=> 103 <sup>rd</sup> Assistant.
Le \fordinalm{1} homme.	=> Le 1 <sup>er</sup> homme.
La \fordinalf{1} femme.	=> La 1 <sup>re</sup> femme.
Der 1\te August.	=> Der 1. August.

To print a formatted *abbreviation* in your text, you may use `\abk{xyz}`. It will only appear on the List of Abbreviations, if you say what it stands for:

```
\abkdef{HMS}{Her Majesty's Ship} HMS (Her Majesty's Ship)
or
\defabk{Her Majesty's Ship}{HMS} Her Majesty's Ship (HMS)
and then \texttt{\bibsort}
will accept \abk{HMS}.           and then \bibsort
                                will accept HMS.
```

For a correct spacing at the end of a sentence, you have to set a separate full stop: `\abk{U.\,K.}`. Next ... => U.K. Next ... (or `\abk{e.\,g.}`). Next). You may use `\printnumabk` (or `\printabk`) to print a List of Abbreviations:

**HMS** Her Majesty's Ship 7

BiArS provides up to three *registers* (geographical, subject, and person). The commands to feed them have one argument. It is invisible in your text, e.g.: `\addtoggrr{London}`, `\addtosrr{Ship}`, and `\addtoprr{Churchill}`. Use `\printnumgrr`, `\printnumsrr`, and `\printnumprr` to print the lists. They are prepared by `\bibsort`. This has nothing to do with MAKEINDEX.

A last feature of BiArS are fill-commands. `\fillgrr`, `\fillsrr`, `\fillprr`, `\fillper`, and `\fillarq` have two arguments. The first has to be identical with *the* argument of a register-entry, or `\per`-command, or *the second* argument of an `\arq`-command (the archive file information). Fill-commands may be used at a central position to add information to an entry on the list:

<pre>\fillprr{Churchill}{1874-1965} Churchill \addtoprr{Churchill} was prime minister.\footnote{   Born \addtoprr{Churchill}   Blenheim Palace.} \renewcommand{\xrrlistemph}{\em} \printnumprr</pre>	<div style="border: 1px solid black; padding: 5px; background-color: #f9f9f9;">           Churchill was prime minister.<sup>18</sup> <hr/> <sup>18</sup> Born Blenheim Palace.         </div> <div style="border: 1px solid black; padding: 5px; background-color: #f9f9f9; margin-top: 10px;"> <b>Person index</b>   <i>Churchill</i> (1874-1965) 7, 7<sup>18</sup> </div>
--	---

Please use commands like `\bfseries` to `\renewcommand` fonts, not `\textbf`:

Command	Predefined	Executed on
<code>\xrrlistemph</code>	{}	entries on grr-, srr-, and prr-lists
<code>\abkemph</code>	{\sffamily}	abbreviations in your text
<code>\abklistemph</code>	{\bfseries}	abbreviations on the abk-list
<code>\kxxemph</code>	{}	last argument of k-commands
<code>\peremph</code>	{\normalfont\scshape}	periodicals \%{\upshape}
